Pogramme Name	Course Code Title of Course	Course Code Title of Course	Developmental Needs	Description about the need addressed
BSc. Zoology	ZOOHAECI	English Communication/Environmental Science	Global	Addresses global communication skills and environmental awareness.
	ZOOHAECII	Non-chordates I: Protista to Pseudocoelomates	National	Provides foundational knowledge in biology, critical for national biodiversity studies.
	ZOOHCCI	Non-chordates I: Practical	National	Supports hands-on skills in studying non-chordate diversity relevant to national ecosystems.
	ZOOHCCIP	Principles of Ecology	Global	Introduces ecological principles essential for addressing global ecological challenges.
	ZOOHCCII	Principles of Ecology: Practical	Global	Develops practical skills for analyzing ecological systems and biodiversity.
	ZOOHCCIIP	Generic Elective-I	Local	Allows for interdisciplinary learning tailored to local academic needs.
	ZOOHCCIII	Generic Elective-I: Practical	Local	Practical learning opportunities in interdisciplinary subjects for local applications.
	ZOOHCCIIIP	English Communication/Environmental Science	Global	Emphasizes global linguistic and ecological understanding.
	ZOOHCCIV	Non-chordates II: Coelomates	National	Focuses on coelomate diversity critical for understanding national biodiversity.
	ZOOHCCIVP	Non-chordates II: Practical	National	Hands-on study of coelomates with relevance to national ecosystems.

ZOOHCCV	Cell Biology	Global	Fundamental to global advancements in biology and biomedical research.
ZOOHCCVP	Cell Biology: Practical	Global	Practical skills for cellular and molecular studies applicable worldwide.
ZOOHCCVI	Generic Elective-II	Regional	Provides options for regional academic interests and skill development.
ZOOHCCVIP	Generic Elective-II: Practical	Regional	Practical learning tailored to regional academic requirements.
ZOOHCCVII	Diversity of Chordates	National	Studies chordate diversity critical for national-level wildlife conservation.
ZOOHCCVIIP	Diversity of Chordates: Practical	National	Practical exploration of chordate biodiversity relevant to national fauna.
ZOOHCCVIII	Physiology: Controlling and Coordinating System	Global	Key for understanding physiological systems relevant to global health issues.
ZOOHCCVIIP	Physiology: Practical	Global	Provides practical skills for studying physiological processes worldwide.
ZOOHCCIX	Fundamentals of Biochemistry	Global	Core knowledge essential for global advancements in biochemistry and medicine.
ZOOHCCIXP	Fundamentals of Biochemistry: Practical	Global	Hands-on biochemistry techniques crucial for global scientific research.
ZOOHCCX	Skill Enhancement Course-I	Regional	Offers skill enhancement relevant to regional employment opportunities.
ZOOHCCXP	Generic Elective-III	Regional	Facilitates interdisciplinary learning tailored to regional needs.

ZOOHCCXI	Generic Elective-III: Practical	Regional	Practical exposure in interdisciplinary subjects relevant to the region.
ZOOHCCXIP	Comparative Anatomy of Vertebrates	Global	Studies comparative anatomy relevant for global scientific and medical research.
ZOOHCCXII	Comparative Anatomy of Vertebrates: Practical	Global	Hands-on exploration of vertebrate anatomy applicable worldwide.
ZOOHCCXIIP	Physiology: Life Sustaining Systems	Global	Essential for understanding life-sustaining physiological systems globally.
ZOOHCCXIII	Physiology: Practical	Global	Practical studies in life-sustaining physiological processes with global applications.
ZOOHCCXIIP	Biochemistry of Metabolic Processes	Global	Addresses biochemical pathways relevant to global metabolic studies.
ZOOHCCXIV	Biochemistry of Metabolic Processes: Practical	Global	Practical biochemistry relevant for global biomedical research.
ZOOHCCXIVP	Skill Enhancement Course-II	Regional	Provides practical skills for regional career opportunities.
ZOOHGE1	Generic Elective-IV	Local	Interdisciplinary elective catering to local academic needs.
ZOOHGE1P	Generic Elective-IV: Practical	Local	Practical exposure in interdisciplinary subjects for local applications.
ZOOHGE2	Molecular Biology	Global	Foundational knowledge for molecular biology research with global impact.
ZOOHGE2P	Molecular Biology: Practical	Global	Practical molecular biology techniques for worldwide applications.

ZOOHGE3	Principles of Genetics	Global	Core genetics principles essential for global research in genetics.
ZOOHGE3P	Principles of Genetics: Practical	Global	Hands-on genetics studies relevant for global biomedical and agricultural research.
ZOOHGE4	Discipline-Specific Elective-I	Local	Focused studies tailored to local academic and career interests.
ZOOHGE4P	Discipline-Specific Elective-I: Practical	Local	Practical exposure tailored to local requirements in the field.
ZOOHSEC1	Aquaculture	Regional	Develops skills for regional industries like aquaculture and fisheries.
ZOOHSEC2	Sericulture	Regional	Focuses on regional sericulture practices relevant for employment.
ZOOHDSE1	Developmental Biology	Global	Essential for understanding developmental processes with global applications.
ZOOHDSE1P	Developmental Biology: Practical	Global	Practical developmental biology techniques for global research needs.
ZOOHDSE2	Evolutionary Biology	Global	Addresses evolutionary principles relevant for global scientific studies.
ZOOHDSE2P	CC-XIV P	Global	Practical focus on evolutionary biology for global research.
ZOOHDSE3	Discipline-Specific Elective-III	Local	Elective focused on specific local developmental needs.
ZOOHDSE3P	Discipline-Specific Elective-III: Practical	Local	Practical exploration of local academic and career-focused topics.
ZOOHDSE4	Discipline-Specific Elective-IV	Local	Advanced elective catering to local developmental requirements.
ZOOHDSE4P	Discipline-Specific Elective-IV: Practical	Local	Practical exposure tailored to local career and academic interests.

BSc. Physiology	code	Subject Name	Developmental Needs	Description
	PHYHCC1	Cellular Basis of Physiology	Global	Foundational knowledge of cell physiology applicable worldwide.
	PHYHCC2	Biological Physics and Enzymes	Global	Essential for understanding biophysical processes and enzymatic activities globally.
	PHYHAECC1	Ability Enhancement Compulsory Course-I	National	Develops compulsory skills for effective national academic progress.
	PHYHGE1	Generic Elective-I	Local	Interdisciplinary elective catering to local academic needs.
	PHYHCC3	Physiology of Nerve and Muscle Cells	Global	Critical for global advancements in neuroscience and muscle physiology.
	PHYHCC4	Chemistry of Biomolecules	Global	Essential for biochemical research with global implications.
	PHYHAECC2	Ability Enhancement Compulsory Course-II	National	Focused on enhancing national-level communication and foundational skills.
	PHYHGE2	Generic Elective-II	Regional	Provides options for region-specific interdisciplinary studies.
	PHYHCC5	Blood and Body Fluids	Global	Core physiological concepts relevant to global health and medical research.
	PHYHCC6	Heart and Circulation	Global	Key for understanding cardiovascular systems relevant to global health.
	PHYHCC7	Nervous System	Global	Critical for neuroscience research and medical studies worldwide.
	PHYHSECA	Skill Enhancement Course-A	Regional	Focused on regional skill enhancement for employability and research.
	PHYHSEC1	- Computer Application	Global	Develops computational skills applicable across global industries

PHYHSEC2	- Physiological Techniques	National	Provides practical skills relevant to national-level physiological research.
PHYHGE3	Generic Elective-III	Regional	Elective addressing regional academic and career needs.
PHYHCC8	Energy Balance and Metabolism	Global	Essential for global understanding of energy dynamics and metabolism.
PHYHCC9	Gastrointestinal Physiology and Nutrition and Dietetics	Global	Addresses gastrointestinal and nutritional health with global applications.
PHYHCC10	Respiration	Global	Studies respiratory processes critical for global biomedical advancements.
PHYHSECB	Skill Enhancement Course-B	Regional	Enhances region-specific skills for public health and clinical practices
PHYHSEC3	- Community Health	Local	Focuses on improving health outcomes within local communities.
PHYHSEC4	- Clinical Biochemistry	National	Provides practical skills for national-level clinical and diagnostic labs.
PHYHGE4	Generic Elective-IV	Regional	Supports regional interdisciplinary education needs.
PHYHCC11	Special Senses	Global	Addresses sensory physiology with relevance to global medical studies.
PHYHCC12	Endocrinology	Global	Focuses on hormonal regulation critical for global health and research.
PHYHDSEA	Discipline-Specific Elective-A	National	Focused electives addressing national developmental priorities.
PHYHDSE1	- Biostatistics	Global	Develops statistical analysis skills for global biomedical research.

PHYHDSE2	- Microbiology and Immunology	Global	Key for understanding microbes and immune systems relevant globally.
PHYHDSEB	Discipline-Specific Elective-B	Regional	Addresses region-specific physiological challenges and opportunities.
PHYHDSE3	- Ergonomics and Occupational Physiology	Regional	Focuses on workplace health and safety relevant to regional industries.
PHYHDSE4	- Community and Public Health	Local	Addresses local public health issues with practical community solutions.
PHYHCC13	Reproductive Physiology and Developmental Biology	Global	Studies reproductive health and development relevant worldwide.
PHYHCC14	Renal Physiology, Skin, Body Temp Regulation, and Health	Global	Addresses renal and thermoregulatory systems critical for global health.
PHYHDSEC	Discipline-Specific Elective-C	Global	Advanced electives catering to global scientific research needs.
PHYHDSE5	- Work, Exercise and Sports Physiology	Global	Addresses sports physiology with applications in global health and athletics.
PHYHDSE6	- Advanced Molecular Biology	Global	Focuses on cutting-edge molecular biology techniques and discoveries.
PHYHDSED	Discipline-Specific Elective-D	National	Electives addressing developmental needs at the national level.
PHYHDSE7	- Chronobiology and Stress Physiology	Global	Studies biological rhythms and stress relevant to global health research.

	PHYHDSE8	- Toxicology and Pharmacology	Global	Critical for global drug development and safety assessment.
BSc. Physics	Code	Subject Name	Developmental Needs	Description
	PHSHCCI	Mathematical Physics-I	Global	Provides foundational mathematical tools essential for physics worldwide.
	PHSHCCII	Mechanics	Global	Fundamental concepts of mechanics applicable globally in science and engineering.
	PHSHAECI	English/Environmental Science	Global	Develops global communication skills and environmental awareness.
	PHSHGEI	Generic Elective-I (From Mathematics, Chemistry, or CS)	Local	Offers interdisciplinary options tailored to local academic and career needs.
	PHSHCCIII	Electricity and Magnetism	Global	Key concepts essential for global advancements in physics and engineering.
	PHSHCCIV	Waves and Optics	Global	Focuses on fundamental wave and optical phenomena with global applications.
	PHSHAECII	Environmental Science/English	Global	Emphasizes environmental and linguistic skills with global relevance.
	PHSHGEII	Generic Elective-II (From Mathematics, Chemistry, or CS)	Regional	Provides region-specific interdisciplinary learning opportunities.
	PHSHCCV	Mathematical Physics-II	Global	Advances mathematical techniques essential for global physics research.
	PHSHCCVI	Thermal Physics	Global	Explores thermal processes crucial for global scientific and industrial applications.

PHSHCCVII	Digital Systems and Applications	Global	Introduces digital technology critical for global advancements in electronics.
PHSHSECI	Skill Enhancement Course-I	Regional	Provides skills in electrical circuits or computer applications for regional needs.
PHSHGEIII	Generic Elective-III (From Mathematics, Chemistry, or CS)	Regional	Offers interdisciplinary electives addressing regional academic priorities.
PHSHCCVIII	Mathematical Physics-III	Global	Advanced mathematical tools necessary for global scientific challenges.
PHSHCCIX	Modern Physics	Global	Explores revolutionary concepts in physics relevant to global research.
PHSHCCX	Analog Systems and Applications	Global	Focuses on analog systems vital for global electronics and instrumentation.
PHSHSECII	Skill Enhancement Course-II	Regional	Skills in basic instrumentation or renewable energy systems with regional applications.
PHSHGEIV	Generic Elective-IV (From Mathematics, Chemistry, or CS)	Regional	Interdisciplinary elective options tailored to regional academic needs.
PHSHCCXI	Quantum Mechanics and Applications	Global	Fundamental for understanding quantum phenomena with worldwide relevance.
PHSHCCXII	Solid State Physics	Global	Addresses properties of solids essential for global materials science and electronics.
PHSHDSEI	Discipline-Specific Elective-I (From Physics DSE Options)	National	Electives aligned with national developmental needs in physics research.
PHSHDSEII	Discipline-Specific Elective-II (From Physics DSE Options)	National	Advanced electives addressing specific national research priorities.

	PHSHCCXIV	Statistical Mechanics	Global	Essential for exploring statistical properties of systems globally.
	PHSHDSEIII	Discipline-Specific Elective-III (From Physics DSE Options)	National	Electives catering to specialized national-level research and applications.
	PHSHDSEIV	Discipline-Specific Elective-IV (From Physics DSE Options)	National	Focuses on advanced topics aligned with national science and technology goals.
BSc. Microbiology	Code	Subject Name	Developmental Needs	Description
	MCBHC1CT1	Introduction to Microbiology and Microbial Diversity	Global	Provides foundational knowledge of microbes essential for global research.
	MCBHC1CP1	Introduction to Microbiology and Microbial Diversity Lab	Global	Hands-on skills in studying microbial diversity relevant worldwide.
	MCBHC2CT2	Bacteriology	Global	Focuses on bacterial physiology and taxonomy important for global health.
	MCBHC2CP2	Bacteriology Lab	Global	Practical skills in bacteriology crucial for global research and diagnostics.
	MCBHGE1	Generic Elective-1 (Choose from GE options)	Local	Interdisciplinary learning tailored to local academic needs.
	MCBHAECC1	English/MIL	National	Enhances linguistic skills critical for national communication and learning.
	MCBHC3CT3	Biochemistry	Global	Fundamental knowledge of biomolecules and metabolic pathways globally relevant.

ECOHC1	Data Analysis and Computer Applications	Regional	Enhances computational and analytical skills for regional economic needs.
ECOHC8	Intermediate Microeconomics-II	Global	Further exploration of microeconomic theories with worldwide relevance.
ECOHC9	Intermediate Macroeconomics-II	Global	Advances macroeconomic analysis applicable to global financial studies.
ECOHC10	Introductory Econometrics	Global	Focuses on econometric methods critical for global data analysis and research.
ECOHC4	Money and Banking	National	Explores monetary systems and banking operations relevant to national development.
ECOHC2	Economics of Floriculture	Local	Addresses economic aspects of floriculture, relevant for local industries.
ECOHC11	Indian Economy-I	National	Detailed exploration of India's economic structure and policies.
ECOHC12	Development Economics-I	Global	Introduces theories and practices in development economics with global applications.
ECOHC5	Economics of Health and Education	Global	Focuses on the economics of health and education, crucial for global welfare.
ECOHC6	Money and Financial Markets	Global	Addresses global financial systems and markets.
ECOHC13	Indian Economy-II	National	Continuation of India's economic studies with policy and structural focus.
ECOHC14	Development Economics-II	Global	Advanced development economics concepts with global relevance.

BNGH102	প্রাচীনওমধ্যযুগেরসাহিত্যইতিহাস	National	Explores the history of Bengali literature from ancient to medieval periods.
BNGH103	প্রাচীনওমধ্যযুগেরসাহিত্যপাঠ	National	Focuses on literary works from the ancient and medieval periods of Bengal.
BNGH104	সংস্কৃতসাহিত্যওবাংলাসাহিত্যেতার প্রভাব	National	Examines the influence of Sanskrit literature on Bengali literary traditions.
BNGH105	প্রাচ্যসাহিত্যতত্ত্ব	National	Studies literary theories and traditions specific to the East.
BNGH201	সাধারণভাষাবিজ্ঞান	Global	Introduces linguistic principles relevant for global language studies.
BNGH202	রবীন্দ্রসাহিত্য	National	Analyzes the literary works of Rabindranath Tagore, a cornerstone of Bengali literature.
BNGH203	পাশ্চাত্যসাহিত্যওবাংলাসাহিত্যেতার প্রভাব	Global	Studies Western literary influences on Bengali literature.
BNGH204	বাঙালিরসংস্কৃতিওসাহিত্যেরপরিচয়	National	Explores the cultural and literary identity of Bengal.
BNGH205	পাশ্চাত্যসাহিত্যতত্ত্ব	Global	Analyzes Western literary theories and their applications to Bengali studies.
BNGH301	বিশতকেরকবিতাওকবিতাপাঠ	National	Studies 20th-century Bengali poetry, reflecting socio-cultural evolution.
BNGH302	বিশতকেরকথাসাহিত্যপাঠ	National	Focuses on 20th-century Bengali prose and fiction.
BNGH303	বিশতকেরনাট্যকারদেররচনা	National	Examines the dramatic works of 20th-century Bengali playwrights.
BNGH304	রম্যরচনা	National	Analyzes humorous and satirical writings in Bengali literature.

	GEO-404	Coastal Ecology and Hazards	Global	Studies coastal ecosystems and strategies for hazard mitigation globally.
	GEO-405	Advanced Quantitative Methods	Global	Covers advanced statistical techniques for geographical data analysis.
	GEO-406	Special Paper Project	Local	Encourages research tailored to local geographical issues.
MSc Mathematics	Paper Code	Subject Name	Developmental Needs	Description
	MTM-101	Real Analysis	Global	Explores fundamental concepts of real analysis essential for global mathematics studies.
	MTM-102	Complex Analysis	Global	Studies functions of complex variables critical for advanced global applications.
	MTM-103	Ordinary Differential Equations and Special Functions	Global	Covers differential equations and special functions applicable to global scientific problems.
	MTM-104	Advanced Programming in C and MATLAB	Global	Develops programming skills using C and MATLAB relevant for global computational problems.
	MTM-105	Classical Mechanics and Non-linear Dynamics	Global	Focuses on mechanics and dynamics with applications in global physical systems.
	MTM-106	Graph Theory	Global	Examines graph theory concepts used in computer science, network analysis, and more.
	MTM-107	Lab. 1: Computational Methods: Using MATLAB	Global	Hands-on experience in computational methods using MATLAB.
	MTM-201	Fluid Mechanics	Global	Studies fluid dynamics critical for global engineering and meteorological applications.

MTM-202	Numerical Analysis	Global	Explores numerical methods essential for solving global mathematical problems.
MTM-203	Abstract Algebra and Linear Algebra	Global	Covers algebraic structures and linear systems with applications worldwide.
C-MTM-204A	Statistical and Numerical Methods	Global	Combines statistics and numerical methods applicable in global research.
C-MTM-204B	History of Mathematics	Global	Examines the historical development of mathematical concepts globally.
MTM-205	General Theory of Continuum Mechanics	Global	Studies continuum mechanics essential for global applications in physics and engineering.
MTM-206	General Topology	Global	Introduces topological concepts relevant for advanced global mathematical studies.
MTM-207	Lab. 2: Language: C-Programming with Numerical Methods	Global	Practical training in numerical methods using C programming.
MTM-301	Partial Differential Equations and Generalized Functions	Global	Explores PDEs and their applications in global scientific modeling.
MTM-302	Transforms and Integral Equations	Global	Covers integral equations and transform techniques for global applications.
MTM-303	Dynamical Oceanology and Meteorology	Global	Focuses on oceanographic and meteorological dynamics critical for global environmental studies.
MTM-304	Operations Research	Global	Explores optimization and decision-making techniques applicable worldwide.

MTM-305	Discrete Mathematics	Global	Studies discrete structures essential for global computing and cryptography.
MTM-305A	Special Paper-OM: Dynamical Oceanology	Global	Advanced study of ocean dynamics relevant to global environmental issues.
MTM-306A	Special Paper-OM: Dynamical Meteorology -I	Global	Explores meteorological models critical for global weather prediction.
MTM-305B	Special Paper-OR: Advanced Optimization and Operations Research	Global	Advanced study of optimization techniques for global industrial and scientific problems.
MTM-306B	Special Paper-OR: Operational Research Modelling-I	Global	Focuses on modeling techniques in operational research with global applications.
MTM-401	Functional Analysis	Global	Studies advanced mathematical analysis with applications worldwide.
MTM-402	Fuzzy Mathematics with Applications	Global	Explores fuzzy logic and its applications in global decision-making systems.
MTM-402	Soft Computing	Global	Introduces soft computing techniques like neural networks and genetic algorithms.
MTM-403	Magneto Hydro-Dynamics and Stochastic Process and Regression	Global	Studies stochastic processes and MHD relevant for global research in physics and finance.
MTM-404A	Special Paper-OM: Computational Oceanology	Global	Focuses on computational techniques in oceanology for global environmental studies.
MTM-405A	Special Paper-OM: Dynamical Meteorology –II	Global	Advanced study of meteorological dynamics for global atmospheric science.

	MTM-404B	Special Paper-OR: Nonlinear Optimization	Global	Covers nonlinear optimization techniques used in global industries and research.
	MTM-405B	Special Paper-OR: Operational Research Modelling-II	Global	Advanced OR modeling for global economic and scientific applications.
	MTM-406	Dissertation Project Work	Local	Encourages application of theoretical knowledge to localized research problems.
	MTM-407A	Special Paper-OM: Lab.: Dynamical Meteorology	Global	Hands-on training in meteorological modeling techniques.
	MTM-407B	Special Paper-OR: Lab. OR Methods using MATLAB	Global	Practical training in operational research using MATLAB.
MSc Physics	Paper Code	Subject Name	Developmental Needs	Description
	PHS 101A	Methods of Mathematical Physics-I	Global	Covers mathematical techniques critical for global physics research.
	PHS 102A	Quantum Mechanics-I	Global	Introduces foundational concepts in quantum mechanics relevant worldwide.
	PHS 103A	Electrodynamics	Global	Studies electric and magnetic fields and their applications in global technologies.
	PHS 104A	Analog Electronics-I	Global	Focuses on analog circuit principles essential for global electronic systems.
	PHS 105	Electronics Practical-I	Global	Provides practical skills in electronics and circuit design.
	PHS 106	Computer Practical	Global	Develops computational skills applicable in physics simulations and data analysis.

PHS 201A	Quantum Mechanics-II	Global	Advanced quantum mechanics topics with applications in global research.
PHS 202A	Solid State Physics-II	Global	Explores the properties of solid materials with global industrial relevance.
PHS 203A	Analog Electronics-II	Global	Builds on analog electronics concepts with advanced global applications.
PHS 204	Concepts of Physics: Inventions and Applications (CBCS)	Global	Examines physics innovations and their applications in everyday global technology.
PHS 205	Electronics Practical-II	Global	Advanced practical training in electronics for global technological applications.
PHS 206	Advance Practical-I	Global	Provides hands-on experience in advanced experimental physics techniques.
PHS 301A	Quantum Mechanics-III	Global	Further explores quantum mechanics with applications in advanced global technologies.
PHS 302A	Molecular Spectroscopy and Laser Physics	Global	Studies spectroscopy techniques and laser applications relevant worldwide.
PHS 303A	Applied Electronics-Analog (Special Paper-I)	Global	Specialization in applied analog electronics with global industrial relevance.
PHS 304	Science of Universe (CBCS)	Global	Explores astrophysics concepts and the structure of the universe.
PHS 305	Advance Practical-II	Global	Further training in advanced physics experiments applicable globally.
PHS 306	Applied Electronics Practical (Special Paper-I)	Global	Practical training in specialized applied electronics.

	PHS 401A	Particle Physics	Global	Studies the fundamental particles and their interactions with applications in global research.
	PHS 402A	Nuclear Physics-II	Global	Explores nuclear physics concepts and their technological applications.
	PHS 403A	Semiconductor Devices	Global	Focuses on the principles and applications of semiconductors in global industries.
	PHS 404A	Applied Electronics-Analog (Special Paper-II)	Global	Advanced specialization in analog electronics with global relevance.
	PHS 405	Applied Electronics Practical (Special Paper-II)	Global	Practical experience in advanced analog electronics applications.
	PHS 406	Project, Seminar and Grand Viva	Local	Encourages in-depth research, presentations, and practical assessments tailored to local and global contexts.
Compulsory AECC	Code	Subject	Developmental Needs	Description
	AECCEL1	Communication Skills in English	Global	Develops effective communication skills in English, essential for global interaction.
	AECCEL2	Communication Skills in English	Global	Focuses on advanced communication techniques for professional and academic settings.
	AECCEL3	Communication Skills in English	Global	Enhances fluency and clarity in English communication applicable worldwide.
	AECCEENV1	Environmental Studies	Global	Introduces environmental challenges and sustainable practices relevant globally.
